

In CLAN TECNOLÓGICA, S.L. we are dedicated business GENERATION TECHNICAL GASES IN SITU, using as raw material : AIR AND WATER according to gas producing and offering our customers an alternative to purchasing packaged gases . We are not manufacturers, properly integrate the technologies of gas generation with the necessary accessories to suit the needs of the customer.

In CLAN TECNOLÓGICA, S.L. we understand Quality, environmental protection, and health and safety assurance as the management tool through which our activities are planned and developed, in order to achieve the purpose of obtaining the full satisfaction of our customers, environmental protection and safety for our staff.

To achieve this, we understand fundamental implementation and development of a Quality, Environment and Health and Safety Management System based on the UNE EN ISO 9001:2015, UNE EN ISO 14001: 2015 and UNE-EN-ISO 45001:2018, take on the following commitments:

- Compliance with regulations in force in our industry, environmental, health and safety regulations and other voluntary requirements, to which the organization subscribes.
- Make quality, respect for the environment and occupational health and safety a basic element of the company's culture.
- Ensure the safety and health of workers at all times, promoting a preventive culture.
- To provide safe and healthy working conditions for the prevention of work-related injuries and health impairment.
- Eliminating hazards and reducing OSH risks.
- Avoid and report risks to which workers may be subjected and evaluate and control those that could not be eliminated.
- Guide our Management System towards continuous improvement, respect for the environment and elimination of risk situations in the workplace.
- Pollution prevention, by minimizing waste production and irrational consumption of resources, minimizing atmospheric emissions and controlling our environmental aspects.
- Make our quality, environment and health and safety policy available to the public and all interested parties.
- Comply the needs and expectations of our customers and all stakeholders, promoting sustainable development.
- Commitment to consultation and participation of workers in OHS matters.
- Coordination and integration of partners and suppliers in the development and application of the integrated management system.
- Adaptation of the integrated management system to technological advances.

The Quality, Environment and Occupational Health and Safety Management System implemented in CLAN TECNOLÓGICA, S.L. it is based and encourages the systematic application of continuous improvement on all activities, meaning that continuous improvement and the need to plan thoroughly the activities to develop, make them according to what has been decided, check the results against planned and correcting when necessary initiating a new cycle of continuous improvement.

To develop these basic principles, Executive Management formulated each year, Quality, Environmental and Occupational Health and Safety Objectives specific to certain areas and / or activities, which are always measurable and consistent with this Policy and the principles it formulated and keeps track of them checking compliance.
